

Grace Somin Lee

MS Student, KAIST, Daejeon, Republic of Korea
gracesomin@kaist.ac.kr — +82 10-2902-1503 — gracesominlee.github.io

RESEARCH INTERESTS

Science and Technology Studies (STS), Human-AI Interaction, AI ethics, Technology Policy, Computational Social Science, LLM-based Simulations, Mixed-methods

EDUCATION

KAIST, Daejeon, Republic of Korea 2025 — 2027 (Expected)
Master of Science in Computational Social Science
Advisor: Prof. June Jeon

Yonsei University, Seoul, Republic of Korea 2019 — 2024
Bachelor of Arts: Political Science and International Relations, Sustainable Development and Cooperation
Undergraduate Thesis: The Era of Digital Humanitarianism: Strategic and Systematic Advancements in Tackling Gender-Based Violence (GBV)

PUBLICATIONS

Conference Proceedings

Published

- Lee, S. (2026). Blame as Sensemaking: A Computational Mapping of Target Framings Across Online AI Discourse. Proceedings of the Extended Abstracts of the 2026 CHI Conference on Human Factors in Computing Systems, CHI EA '26, 1–7. <https://doi.org/10.1145/3772363.3798646>

Manuscript in preparation

- Lee, G. S., & Jeon, J. (2026). Futuring the Quasi-Human: Contested Imaginaries of AI-Human Boundaries Across Institutional and Vernacular Discourse.

PRESENTATIONS

- Lee, S., & Jeon, J. (2026). *Public Sensemaking of AI agency and responsibility: A computational analysis of online blame language*. Paper to be presented at the 2026 Spring Conference of the Korean Association of Science and Technology Studies, Daejeon, Republic of Korea.

PROJECTS

When AI Speaks from Experience: Navigating Relational Expectations Toward Self-disclosing AI Daejeon, Republic of Korea
Group Research Project Mar 2026 — Jun 2026

- Designed a within-subject pilot study comparing self-disclosing and non-disclosing AI chatbots to examine how AI self-disclosure shapes perceived emotional responsiveness, understanding, and trust.
- Developed the experimental protocol, Qualtrics survey flow, chatbot interaction procedure, and follow-up interview structure for participant evaluation of human–AI relational expectations.
- Analyzed survey and interview responses to show that participants anthropomorphized chatbot cues while still rejecting AI self-disclosure as lacking lived experience, reciprocity, and embodied empathy.

Trust thy Science, Trust thy Neighbor?: Modeling Attitudes toward Science and Technology through Social Inclusion and Anxiety Daejeon, Republic of Korea
Independent Research Project Sep 2025 — Dec 2025

- Analyzed World Values Survey Wave 7 data from 88,713 respondents across 65 countries to examine public attitudes toward science and technology.
- Constructed composite indices for science and technology optimism, social inclusivity, and anxiety using factor analysis and reliability checks.
- Applied multilevel linear modeling and Bayesian analysis to assess cross-national variation in the relationship between social inclusion, anxiety, and science and technology optimism.

AI-Based Materials Science Technology and Policy Trends Report

Research Assistant, commissioned by Korea Institute of Ceramic Engineering and Technology

Daejeon, Republic of Korea

Oct 2025 –

- Conducted background research on emerging AI applications in materials science, including graph neural networks, foundation models, and self-driving laboratories.
- Compared policy support cases across major national and regional innovation systems, including the United States, China, Europe, and Canada.
- Synthesized technical and policy trends into presentation materials for a commissioned report on AI-driven materials science innovation.

Sustainable Act Spatial Map (SASM) Project, Sustainable Development Program

Research Unit Leader

Seoul, Republic of Korea

Feb 2022 – Feb 2023

- Led the development of an interactive sustainability map by collecting and validating 150+ location-based entries.
- Developed a gamification roadmap for app development in collaboration with the developer team.
- Designed user surveys on veganism and sustainability and shaped the project's brand identity for external pitching.

AWARDS & GRANTS

Master's Student Research Grant, National Research Foundation of Korea (NRF)

KRW 12,000,000 research grant. PI: Grace Somin Lee. Project: *Public sensemaking of AI agency and responsibility: A mixed-methods analysis of blame in online discourse.* Sep 2026 – Aug 2027

Venture Research Program for Master's and PhD Students, College of Liberal Arts and Convergence Science, KAIST

KRW 3,000,000 research grant. PI: Grace Somin Lee. Project: *Public sensemaking of AI agency and responsibility: A mixed-methods analysis of blame in online discourse.* Apr 2026 – Dec 2026

Innovation Support Scholarship, Institute for Higher Education Innovation, Yonsei University

KRW 2,500,000. Project: Sustainable Act Spatial Map (SASM), Sustainable Development Program.

Spring 2022

Innovation Support Scholarship, Institute for Higher Education Innovation, Yonsei University

KRW 1,000,000. Project: ESG and Sustainable Smart Cities Seminar Series, Sustainable Development Program. Fall 2022

TEACHING

Contemporary Social Theory, KAIST

Teaching Assistant, Instructor: Prof. June Jeon

Daejeon, Republic of Korea

Spring 2026

- Assisted with course administration, student communication, and discussion support for an undergraduate social theory course.

WORK EXPERIENCE

UN Women Knowledge and Partnerships Centre

Research and Data Support Intern

Seoul, Republic of Korea

Feb 2025 – Aug 2025

- Developed geospatial visualization code and training materials for a regional data-use training program for national statistical office staff in Asia and the Pacific.
- Conducted research using geospatial data, APIs, and health survey data to examine the relationship between fishing activity and women's health outcomes in coastal areas.
- Supported the planning and coordination of an academic conference on AI and gender.
- Assisted meetings on developing a statistical framework for measuring gender-based violence.

The Asia Foundation

Program Associate (Internship)

Seoul, Republic of Korea

Aug 2024 – Sep 2024

- Collected and analyzed participant data to report the impact of scholarship programs for North Korean defectors.
- Designed surveys for post-program analysis of cybersecurity education for MSMEs.

SKILLS

- **Programming:** R, Python
- **Languages:** Korean (Fluent/Native), English (Fluent/Native), Spanish (Intermediate)
